

HOW TO BUY \$KROM ON ETHEREUM MAINNET

* instructions *

For these instructions, we presume you already have a Metamask wallet.

If this is not the case, please go to <https://metamask.io>, create a wallet, set-up your password, secure your seedphrase and add the preferred amount of ETH to the Ethereum mainnet.

The following instructions guide you on how to buy KROM on the Ethereum mainnet, using the Kromatika swap aggregator.

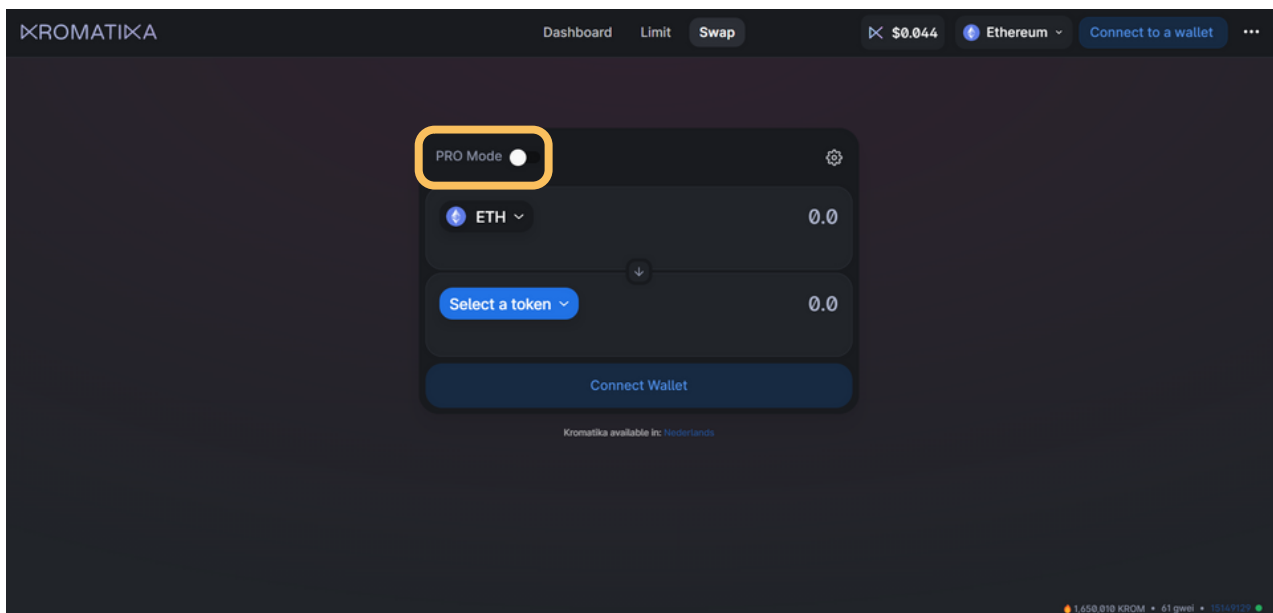

1- Go to Kromatika.finance

You can go to Kromatika.finance or go directly to our dapp:

<https://app.kromatika.finance/#/swap>

By default, the KROM/WETH pair will open.

You can choose to stay in the regular mode or switch to 'PRO Mode' using the slider. This will give you access to more detailed charts and trading data.

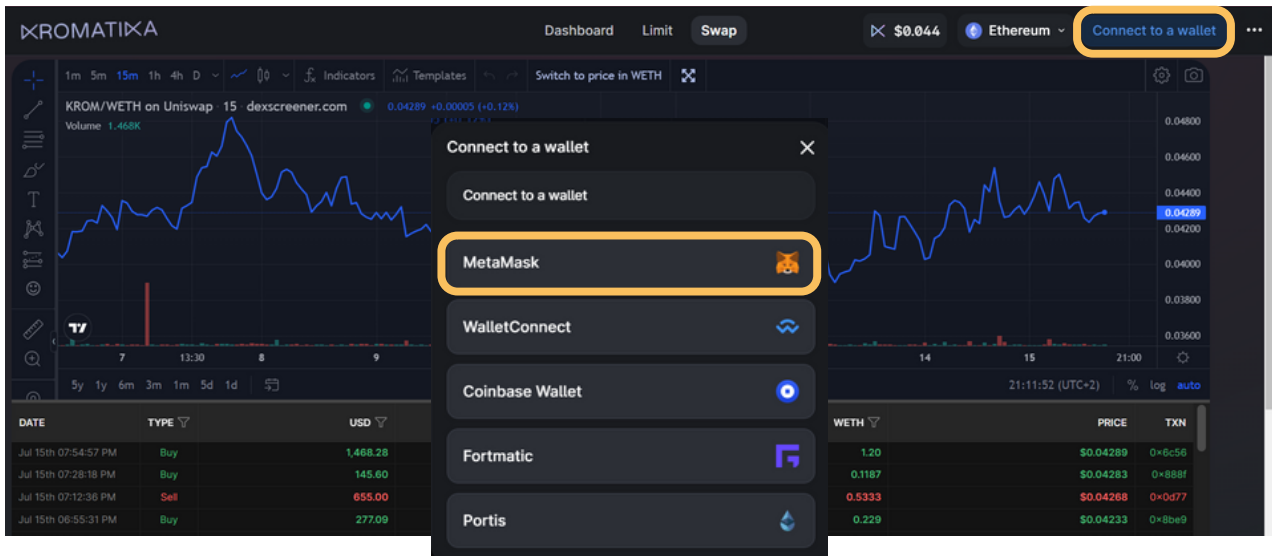

HOW TO BUY \$KROM ON ETHEREUM MAINNET

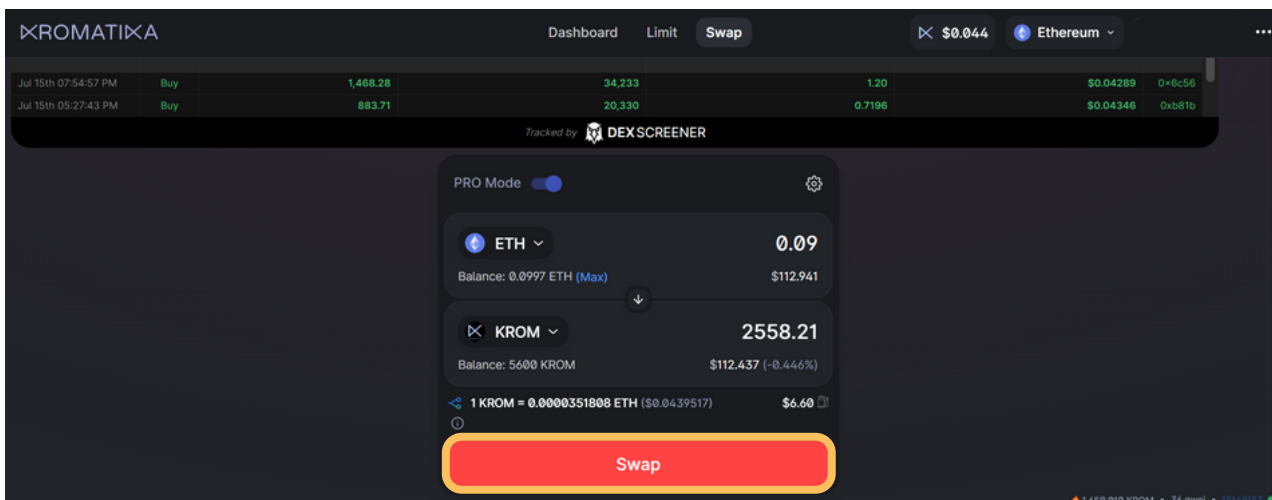

* instructions *

2- Connect your wallet

3- Set up your swap

Now that your wallet is connected, enter the amount of ETH you want to swap for KROM. You will need to pay ETH gas fees, so select an amount lower than your max ETH value. Now click 'Swap'.

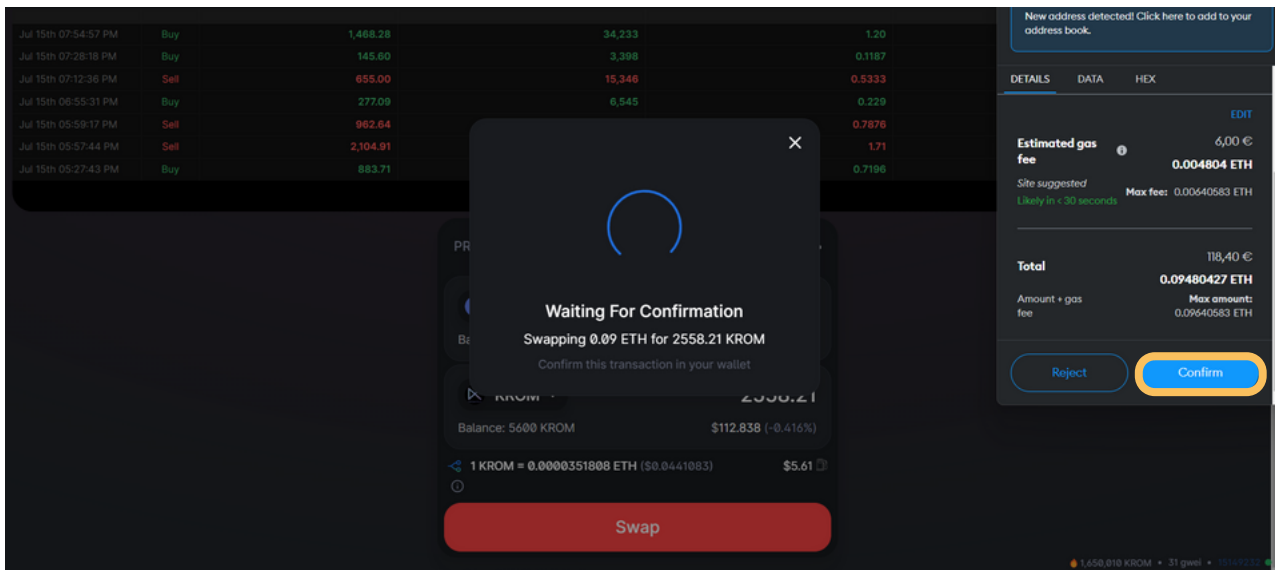

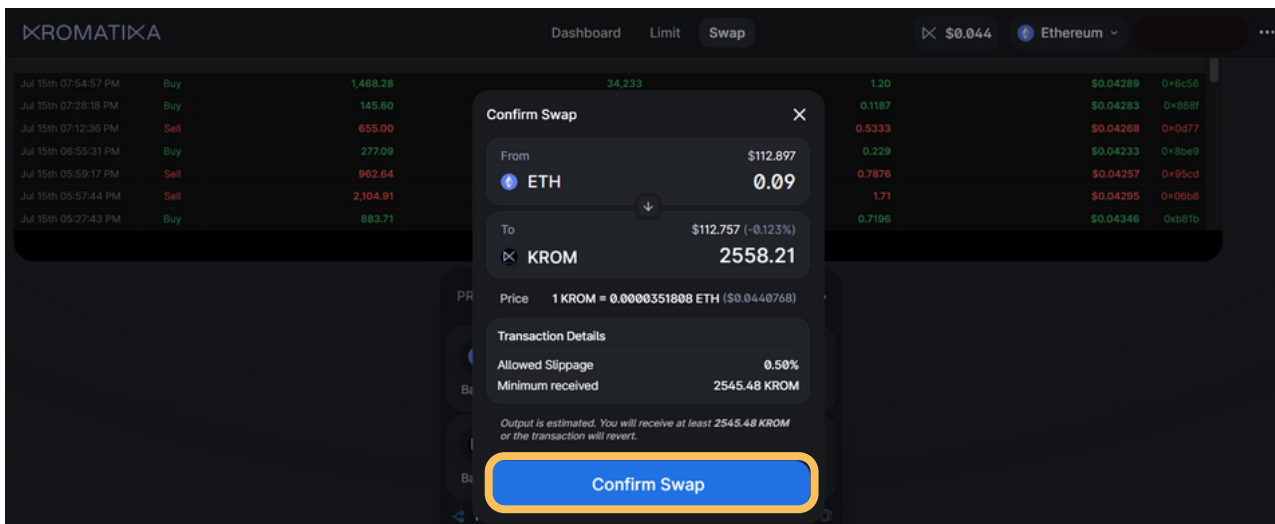

HOW TO BUY \$KROM ON ETHEREUM MAINNET

* instructions *

4- Confirm the transaction

Review the details of your swap and click 'Confirm Swap'. Next, you will be asked to confirm the transaction in your Metamask wallet.

* instructions *

5- Add KROM to your Metamask

Once you have bought your KROM, you want to add KROM to your Metamask list of tokens.

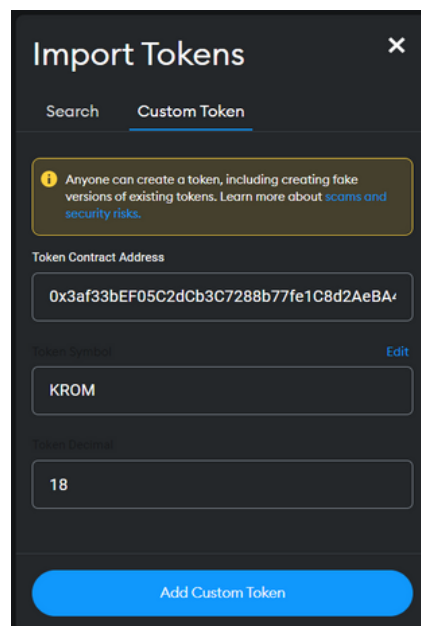

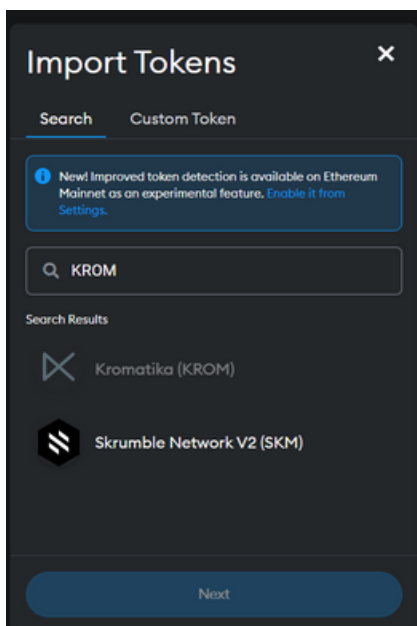

First, go to your Metamask (open the extension in full screen) and click on 'Import tokens' on the bottom of the screen.

You can either search for the token KROM and select it from the drop down. Or, in case that isn't working, you can add a Custom Token via the KROM contract address:

0x3af33bEF05C2dCb3C7288b77fe1C8d2AeBA4d789

Click on confirm to add KROM to your token list.

HAPPY TRADING!
